

Maintenance Workshops: Caring for Your Stormwater-Friendly Landscapes

Learn how to care for and maintain:

- **Rain gardens**
- **Permeable pavement**
- **Rain barrels**
- **Shade trees**
- **BayScaping**

Rain gardens, permeable pavement, rain barrels, shade trees, and BayScaping capture and infiltrate stormwater. They prevent pollution from entering our streams and rivers, beautify your yard, increase property values and can lower your stormwater fees.

If you have had the above practices installed through DDOE's RiverSmart Homes program, installed one on your own, or are considering them for the future, come learn about how to keep them looking beautiful and functioning well!

How do I sign up for a maintenance workshop?

Register for a maintenance workshop on the [REGISTRATION FORM](#).

Workshops will take place on two dates:

April 19th, 2014, 10am to 12pm

Takoma Park Recreation Center
300 Van Buren Street, NW
Washington, DC 20012.

May 3rd, 2014, 10am to 12pm

Anacostia Park Skate Pavilion
1900 Anacostia Drive, SE
Washington DC, 20020
